### Aim & Scope-

The image Forensic and Blockchain Technologies are two fields, which have lot of scope in day-to-day life. The automation, detection, and trust are thrust area of this fields. We feel that world is progressing in the direction of automation, which require the imaging technologies to play a larger role. Detection is also related to image forensic, which is required to detect the changers made in original images and automation. Image detection can also be used in diseases of human and plants. Blockchain technologies can be used for trust. The papers related to these topics are welcome.

### Subtopics:

1. Image Forensic
2. Images for Diseases detection
3. Steganography
4. Watermarking
5. Blockchain Technology for Identity Management
6. Image Fingerprinting
